Expected Graduation: 2028

SKILLS

- Interpersonal Skills
- Adaptability
- Consensus Building
- Inclusivity

EXPERIENCES AND ACTIVITIES

- **Arrupe Volunteers' Club | Core Officer**
 - Coordinated with over 50 volunteers in community engagements with 3 communities.
- **Computer Studies | Logistics Committee Member**
 - Handled tasks in cluster events; purchasing errands, venue preparation, managing supplies, liaising, and cleanup.
- **Computer Studies and Cateneo | Documentations Member**
 - Produced photographic records for cluster and organization events.

Comparison Table

Criteria	ChatGPT	Gemini
Structure	LLM followed the structure of the prompt.	LLM followed the structure of the prompt.
Clarity	Since LLM has the same structure, the generated content is clear.	Since LLM has the same structure, the generated content is somewhat clear. This is because the absence of lines of section may hinder clarity a bit.
Formatting	LLM arranged the content to follow the prompt's arrangement.	LLM arranged the content to follow the prompt's arrangement.
Overall Quality	This LLM has more detailed information placed in the experiences and activities section. There is sectioning present, so it is easier to read. Overall, the quality is good as it did not stray away from the instructions.	This LLM only inputs the exact content of the prompt. There is no clear sectioning present, and it looks way too tight. The quality is also good as it only followed what the prompt says.

Reflection

In my comparison, I found that ChatGPT performed better than Gemini for creating a resume. ChatGPT's output felt more professional and was much easier to read. It stuck closely to my original prompt without adding unnecessary changes. On the other hand, Gemini's version was less impressive. The text was too large and the layout felt cramped, which made it hard to see the different sections clearly. If a hiring manager looked at it, they might get frustrated or miss important details. To improve my final resume, I decided to add more information, such as a Profile and a References section. This helped the page look full rather than empty. I also divided the layout into two halves to organize the details better and used ChatGPT's clean format for my name and contact information. I also made sure to include my address. The biggest lesson I learned about prompting is that the AI follows your instructions exactly. Because it is so literal, you have to be very specific to get the result you want. No matter what you type, the AI will try to do it, so clear instructions are the key to success. This project showed me that while AI is helpful, it still needs human guidance to look its best.

Final Resume

Sean Ashley Maxey
